D_{griz}: model target completeness = 20%

HST measured completeness
HST measured contamination
V12 predicted contamination
20% target (V12)

Fraction

$r_{\mathrm{Sérsic}}$ magnitude

D_{griz}: model target completeness = 50%

HST measured completeness
HST measured contamination
V12 predicted contamination
50% target (V12)

Fraction

$r_{\mathrm{Sérsic}}$ magnitude

D_{griz}: model target completeness = 90%

HST measured completeness
HST measured contamination
V12 predicted contamination
90% target (V12)

Fraction

$r_{\mathrm{Sérsic}}$ magnitude
